

The Impact AI Framework

A trusted, consistent pathway for AI literacy, skills validation, and workforce readiness

Built in partnership with ETS, OpenAI, and aiEDU to deliver standards-based AI education across the full learning continuum

One Framework. Every Audience.

The Impact AI Framework provides a unified structure that scales across K-12, higher education, and corporate training — ensuring consistent, comprehensive AI competency.

Using AI Effectively

Practical skills for applying AI tools in real-world scenarios

WHAT YOU'LL LEARN

- ✓ Hands-on experience with leading AI tools
- ✓ Practical applications for real-world scenarios
- ✓ Task-specific AI workflows
- ✓ Productivity and efficiency gains
- ✓ Best practices for tool selection
- ✓ Integration with existing processes

Examples: Using AI for writing assistance, research, data analysis, content creation, problem-solving, and decision support.

Understanding AI Technology

Core concepts and mechanics behind artificial intelligence

WHAT YOU'LL LEARN

- ✓ Machine learning fundamentals
- ✓ Natural language processing concepts

- ✓ Computer vision basics
- ✓ How AI models are trained
- ✓ Understanding AI capabilities and limitations
- ✓ Data's role in AI systems

Examples: How neural networks work, the difference between AI and traditional programming, how models learn from data, and what makes AI "intelligent."

Ethics of AI

Responsible and ethical AI usage in learning and work

WHAT YOU'LL LEARN

- ✓ Identifying and addressing AI bias
- ✓ Privacy and data protection
- ✓ Academic and professional integrity
- ✓ Transparency and explainability
- ✓ Social impact considerations
- ✓ Regulatory compliance awareness

Examples: Recognizing biased AI outputs, protecting sensitive information, using AI without plagiarism, and understanding the societal implications of AI deployment.

Why the Impact AI Framework Works

Consistent Structure

The same three-tier approach works for 6th graders, college students, teachers, and executives — just adapted to their context.

Comprehensive Coverage

Balances practical skills, technical understanding, and ethical awareness — all three are essential for true AI competency.

Research-Backed

Developed with ETS, OpenAI, and aiEDU using best practices in education, assessment, and AI technology.

One Framework, Multiple Audiences

See how the Impact AI Framework applies to different learners

Educators

Learn to integrate AI effectively and ethically in your teaching practice

[Learn More →](#)

Students

Build AI literacy from middle school through college with age-appropriate learning

[Learn More →](#)

Workforce

Develop measurable AI competency across your organization

[Learn More →](#)

Complete Learning Ecosystem

The Impact AI Framework is delivered through four integrated components

Curriculum

Aligned instructional content for each tier of the framework

AI Labs

Cloud-based platform for hands-on AI practice and experimentation

Assessments

Psychometrically sound exams to validate competency

Certification

ETS-backed credentials that validate your AI skills
