

A 21st Century Talent Ecosystem

Skills Stack

End-to-End, Flexible Solution for Student Success and Career Outcomes

Solution Elements

 Direct Measurement Existing and New	Existing measurement suite w/ demonstrable case studies + novel skills assessments/experiences/etc. + licensure tools via PSI.
 Skill Extraction & Inference Novel Gen-AI Capabilities	Brings the speed/scale needed for viability at fraction of the cost of traditional analytics methods + integration with SIS/LMS.
 Skills Transcript Verified Evidence of Skills	Authentic, verified evidence of skills for skills-based student success, admissions, gainful employment/job-matching, outcomes tracking, and WFD.
 Insight Generation Talent-Flow Efficiency + Revenue	Novel actionable-insight generation with direct student success outcomes and/or tuition/revenue implications (HE) + direct efficiency gain for TA + retention + talent pyramid management (WF)
 AI-Enabled Insight Generation	AI-powered automation will enable scalability and positive feedback loop to increase impact/breadth of verified student support/workforce outcomes and insights.

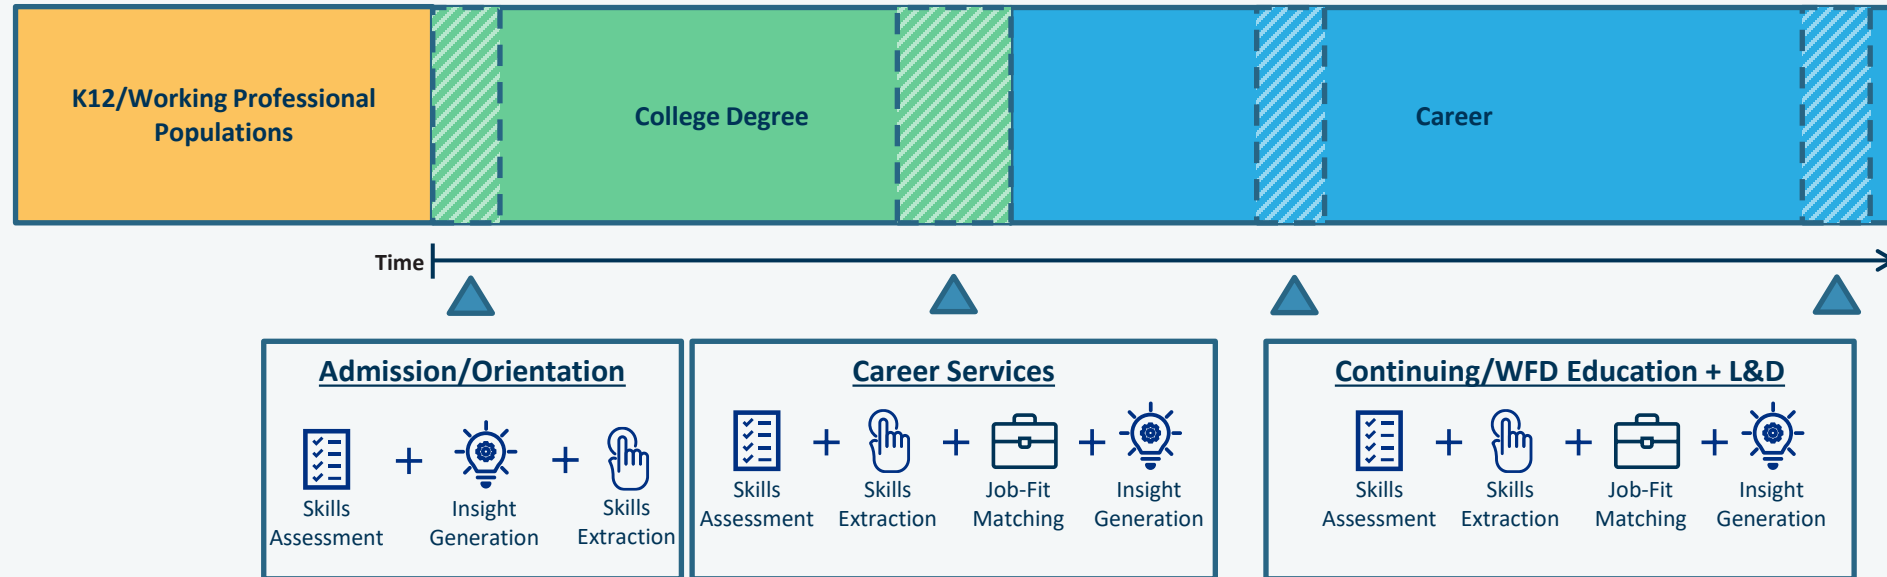

Use Case

 Skills baseline for student success, advising, career exploration, career services, upskilling, etc.
 Summative skills assessment for quantified skills delta, job-fit-matching for career services, and presentation of skills-profile to employers.
 Improved tracking capability via direct employer engagement + AI-powered, automated alumni outcomes tracking function
 Partner with 900+ strong research + psychometrician team to co-identify and generate actionable insights for increased student success.
 Future State → SIS/HCM-integrated student success/employment outcomes platform to provide actionable insights to the right stakeholders in real time.

Student Journey

What could this look like?

Student UI/UX "Product": Skills Transcript - better data for students to understand and convey their skills

K12/HE UI/UX "Product": Skills Transcript - more data for student success/career services personnel to better serve students

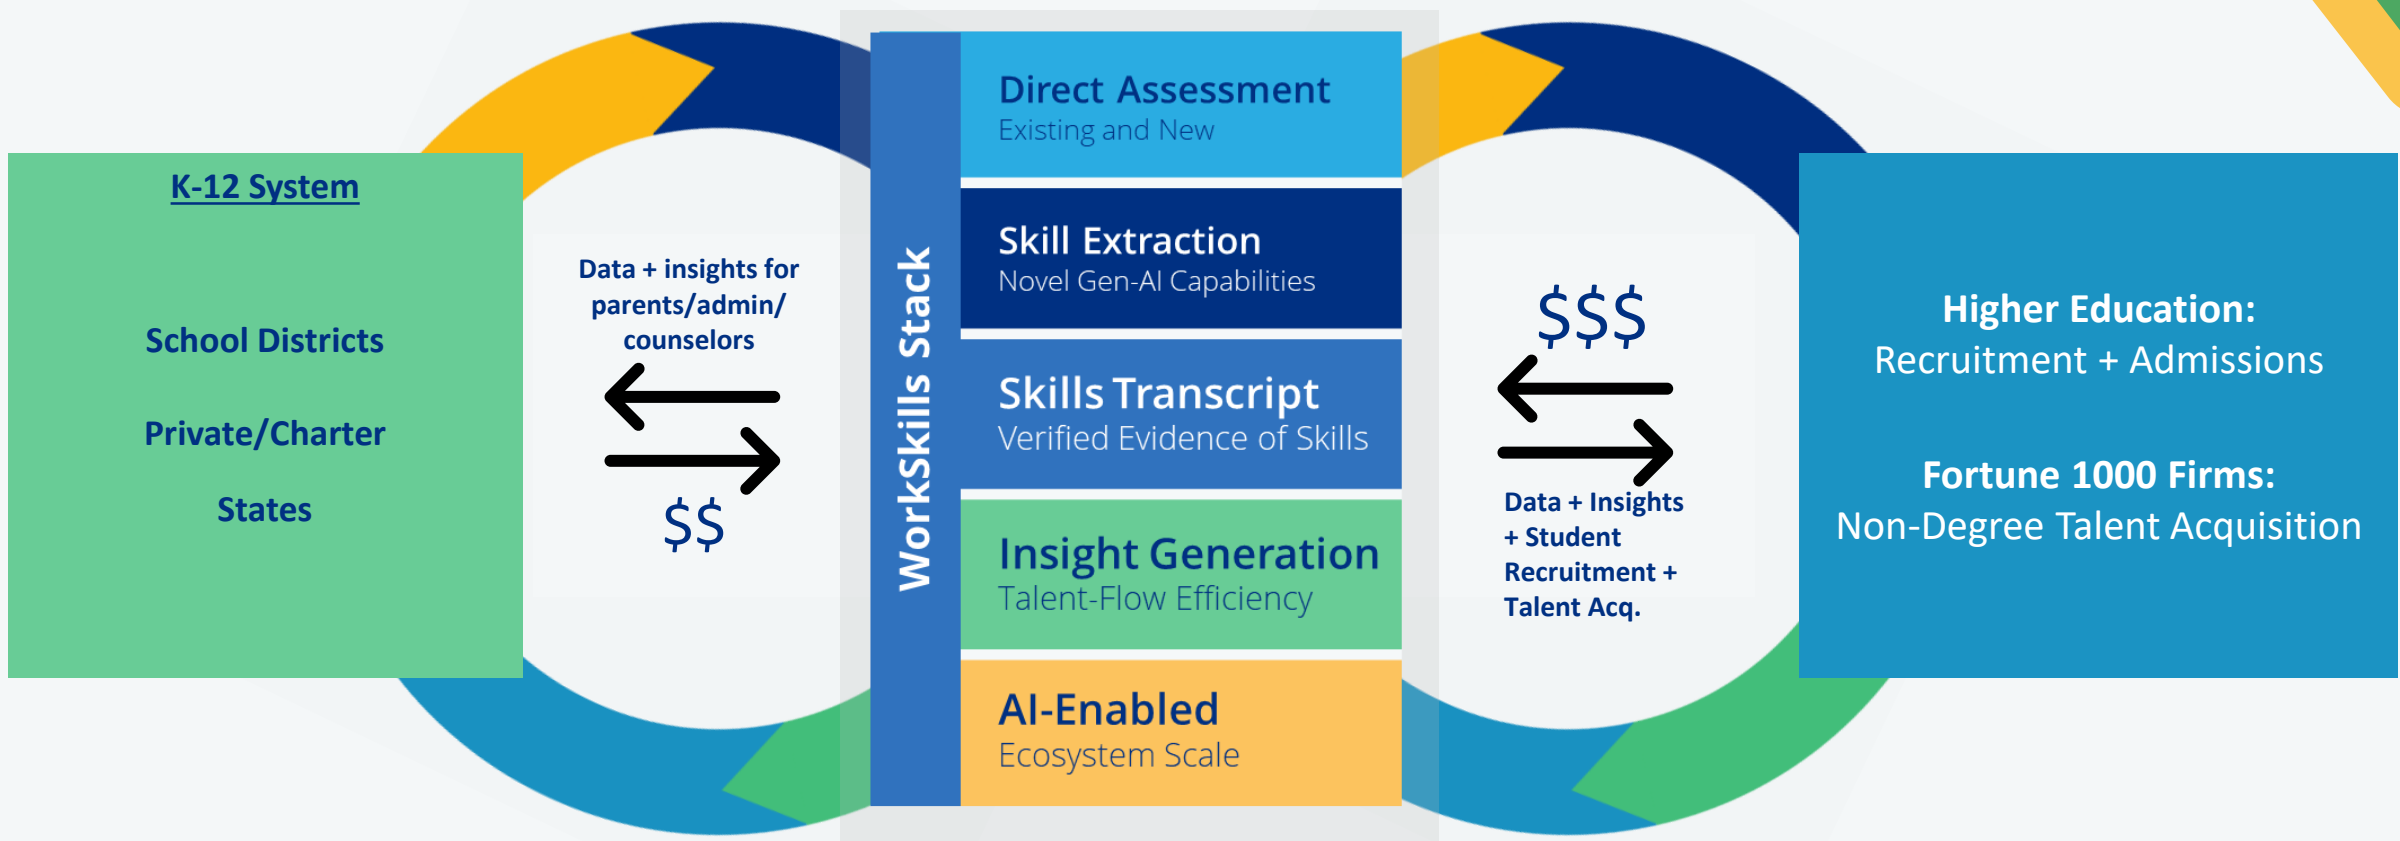

Workforce UI/UX "Product": Skills Transcript - More data for employers to de-risk hiring decisions and improve talent retention

Real Value: Actionable Insights - the right data for the right stakeholders at the right time to improve the efficiency of the education-to-workforce ecosystem

Intentional K12-to-College/Career Ecosystem

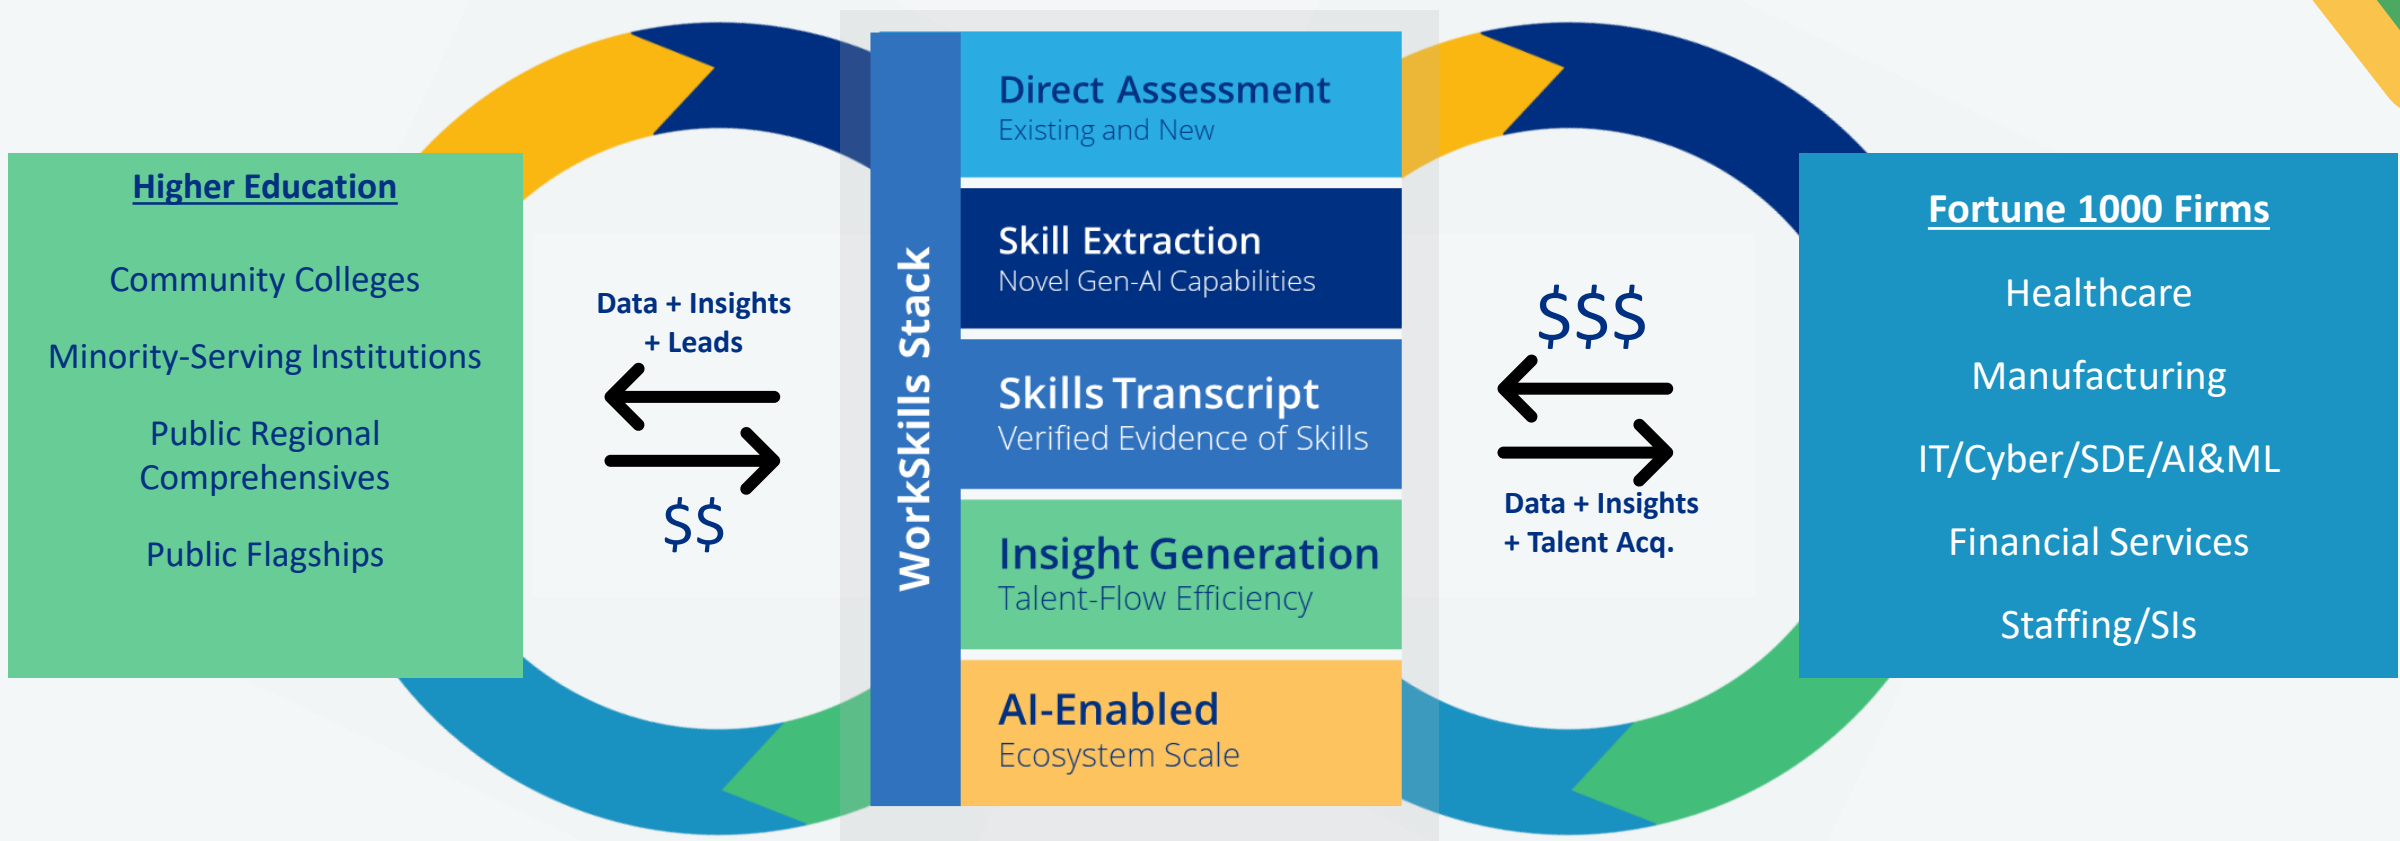

Treat the disease, not the symptoms – better data visibility to drive outcomes, empower, learn and optimize

Future state – skills-based direct admission and FA/scholarship award via direct integration with SIS in K12 and HE, skills-based direct talent acquisition via direct integration with HCM/ATS at employers.

Intentional Higher Education-to-Work Ecosystem

Treat the disease, not the symptoms – better data visibility to drive outcomes, empower, learn and optimize

Future state – elimination of talent sourcing platform market through skills-based direct talent acquisition via direct integration with employer HCM/ATS.

Long-Term Workforce Development

Virtuous Feedback Loop for Continuous Ecosystem Optimization

4. Learn and Optimize

Feed skills assessment/extraction/outcomes data into AI-powered insight generation engine to continually optimize recommendations/insights for incremental efficiency gain across K-20 workforce ecosystem.

3. Talent Empowerment

Re-establish K-12/HE's position as the US workforce engine using skills-matching success/outcomes to **show all students/parents quantifiable proof that family-wage-sustaining careers are possible**, and that millions of people with skills like theirs are doing these jobs today, regardless of means, major, discipline, or background.

1. Student Success

Skills transcript analyzed against existing academic/performance data and priority KPIs to provide **skills-based K12 counseling, skills-based admissions, skills-based student success** to increase participation, retention, and graduation rates by 10%-15%, directly increasing HE tuition revenue and helping achieve institutional/state/national education targets (ETS already conducts NAEP work)

2. Employment Outcomes

Provide employers seeking qualified talent insights into:

- 4+ year line-of-sight into diverse, untapped talent pools on a geo-targeted basis
- De-risked hiring of non-traditional talent
- Skills-based talent ID for upskilling and promotion of internal talent
- Long-term talent pyramid management reduces churn and gains cost efficiency
