Notes

- **All 24 named targets are ETPL-listed.** This is the go-list.
- "Locations" = distinct campus records in the DOL index. Multi-campus systems (Motlow, Houston CC, Lone Star, Cuyahoga, Sinclair, Salt Lake) appear multiple times, typically one per campus.
- "Programs" = total WIOA-gated programs visible in the DOL index for the primary ETP name. Name variants (e.g., Columbus State as "Columbus State Comm. College") can split counts across records.
- **Dallas College shows only 1 program.** Likely a data-refresh lag in the DOL index post-merger; worth flagging for follow-up since the institution enrolls 70K+.
- **Borough of Manhattan** shows as "Other" and "Private For-Profit" entity types — state-reported classification, not IPEDS; worth a sanity check.

Method

Each institution was queried against the DOL Elasticsearch provider index with a state-filtered phrase-match on the institution name, plus two common abbreviation variants ("Community College" → "Comm. College" / "Community Coll"). Program counts use a second query against the programs index for the primary ETP name. Hits were filtered to those whose `field_etp` actually contained the institution's core name, to suppress false positives from name-prefix collisions.
